Atlanta, GA – February 11, 2025 – Mirion (“we” or the “company”) (NYSE: MIR), a global provider of radiation detection, measurement, analysis, and monitoring solutions to the medical, nuclear, defense, and research end markets, today announced results for the fourth quarter and full year ended December 31, 2024.

“We are pleased to report record 2024 performance, with good momentum continuing into 2025,” commented Mirion’s Chief Executive Officer Thomas Logan. “Both fourth quarter and full year performance marked record revenue, record adjusted EBITDA, and record adjusted EPS all while delivering on our full year guidance. We also simplified our capital structure and significantly improved our net leverage during the year.”

Logan continued, “Our Nuclear & Safety and Medical Groups grew fourth quarter organic revenue and enhanced their adjusted EBITDA margin performance compared to the same period last year. The fourth quarter reflects continued progress towards the 2028 long-range plan introduced at our Investor Day.”

Logan concluded, “We entered 2025 with approximately half of expected 2025 revenue in our backlog. We are advancing discussions on the \$300 - \$400 million of large order potential previously disclosed and see increased opportunities to bid on other large deals. Moreover, short order-cycle time flow business continues to reflect positive momentum from our key vertical markets.”

2025 Guidance

Commenting on Mirion’s full year 2025 guidance, Logan said, “We are reaffirming the 2025 financial guidance that we shared at our Investor Day and are introducing adjusted EPS guidance. We are confident in our ability to continue to grow the business, deliver margin expansion, and drive greater free cash flow in 2025 and beyond.”

Mirion has provided the following guidance for the fiscal year ending December 31, 2025.

- **Revenue growth** of approximately 4.0% – 6.0%; includes a foreign exchange rate headwind of approximately 190 basis points

News Release

- **Organic Revenue growth** of approximately 5.5% – 7.5%; includes an approximately 30 basis point lasers business closure headwind from 2024
- **Adjusted EBITDA and Adjusted EBITDA margin** of approximately \$215 million - \$230 million and 24.5% - 25.5%, respectively; includes a foreign exchange rate headwind to adjusted EBITDA of approximately \$6 million
- **Adjusted Free Cash Flow** of approximately \$85 million - \$110 million; adjusted Free Cash Flow Conversion of approximately 39% - 48% of adjusted EBITDA
- **Adjusted EPS** of approximately \$0.45 – \$0.50 per share

Additional modeling and guidance assumptions are included in the earnings presentation on the Company's investor relations page.

The Company's guidance contains forward-looking statements and actual results may differ materially as a result of known and unknown uncertainties and risks, including those set forth below under the heading "Forward-Looking Statements." In addition, forward-looking non-GAAP financial measures are presented on a non-GAAP basis without reconciliations of such forward-looking non-GAAP measures due to the inherent difficulty in projecting and quantifying the various adjusting items necessary for such reconciliations, such as stock-based compensation expense, amortization and depreciation expense, merger and acquisition activity and purchase accounting adjustments, that have not yet occurred, are out of Mirion's control, or cannot be reasonably predicted. Accordingly, reconciliations of our guidance for organic revenue growth, adjusted EBITDA, adjusted EPS, adjusted free cash flow and adjusted free cash flow conversion are not available without unreasonable effort.

Reconciliation of Non-GAAP Financial Measures

In addition to our results determined in accordance with GAAP, we believe the following non-GAAP measures are useful in evaluating our operating performance. We use the following non-GAAP financial information to evaluate our ongoing operations and for internal planning and forecasting purposes. We believe that non-GAAP financial information, when taken collectively, may be helpful to investors because it provides consistency and comparability with past financial performance. However, non-GAAP financial information is presented for supplemental informational purposes only, has limitations as an analytical tool, and should not be considered in isolation or as a substitute for financial information presented in accordance with GAAP. Other companies, including companies in our industry, may calculate similarly titled non-GAAP measures differently or may use other measures to evaluate their performance, all of which could reduce the usefulness of our non-GAAP financial measures as tools for comparison.

Investors are encouraged to review the related GAAP financial measures and the reconciliation of these non-GAAP financial measures to their most directly comparable GAAP financial measures and not rely on any single financial measure to evaluate our business.

Organic revenues is defined as Revenues excluding the impact of foreign exchange rates as well as mergers, acquisitions and divestitures in the period.

Adjusted EBITDA is defined as net income before interest expense, income tax expense, depreciation and amortization adjusted to remove the impact of foreign currency gains and losses, amortization of acquired intangible assets, changes in the fair value of warrants, certain non-operating expenses (restructuring and costs to achieve operational synergies, merger, acquisition and divestiture expenses and IT project implementation expenses), stock-based compensation expense, debt extinguishment and income tax impacts of these adjustments.

Adjusted EBITDA margin is defined as Adjusted EBITDA divided by Revenue.

Adjusted net income is defined as GAAP net income adjusted for foreign currency gains and losses, amortization of acquired intangible assets, changes in the fair value of warrants, certain non-operating expenses (restructuring and costs to achieve operational synergies, merger, acquisition and divestiture expenses and IT project implementation expenses), stock-based compensation expense, debt extinguishment and income tax impacts of these adjustments.

Adjusted EPS is defined as adjusted net income divided by weighted average common shares outstanding — basic and diluted.

Adjusted free cash flow is defined as free cash flow adjusted to include the impact of cash used to fund non-operating expenses. We believe that the inclusion of supplementary adjustments to free cash flow applied in presenting adjusted free cash flow is appropriate to provide additional information to investors about our cash flows that management utilizes on an ongoing basis to assess our ability to generate cash for use in acquisitions and other investing and financing activities.

Adjusted Free Cash Flow Conversion is defined as adjusted free cash flow divided by adjusted EBITDA.

Free cash flow is defined as U.S. GAAP net cash provided by operating activities adjusted to include the impact of purchases of property, plant, and equipment, purchases of badges and proceeds from derivative contracts.

Net leverage is defined as Net Debt (debt minus cash and cash equivalents) divided by Adjusted EBITDA plus contributions to Adjusted EBITDA if acquisitions made during the applicable period had been made before the start of the applicable period.

Operating Metrics

Order growth is defined as the amount of revenue earned in a given period and estimated to be earned in future periods from contracts entered into in a given period as compared with such amount for a prior period. Foreign exchange rates are based on the applicable rates as reported for the time period.

Adjusted order growth (decline) is defined as order growth (decline) adjusted to exclude large, one-time orders and the impact of acquisitions and divestitures.
