Mirion Technologies Announces Radiation Monitoring Systems Contract With Louisiana Energy Services

SAN FRANCISCO--(BUSINESS WIRE)--

Mirion Technologies Radiation Monitoring Systems Division announced that today it has been awarded a second contract by Louisiana Energy Services (LES) to supply radiation monitoring systems equipment for the National Enrichment Facility under construction in Lea County, New Mexico.

The particulate monitors from Mirion's MGP Instruments product line provide critical process and event monitoring information that will be necessary for the safe and efficient operation of the facility. They are designed to operate under a wide range of operating conditions and will be manufactured in the U.S.

"We are delighted that LES has reiterated its support by purchasing additional systems," said Jean-Louis Gouronc, President of the Radiation Monitoring Systems Division. "We look forward to continuing to provide them with outstanding products and services."

Mirion's Radiation Monitoring Systems Division is recognized as the global leader in the design and manufacture of radiation monitoring systems.

ABOUT MIRION TECHNOLOGIES

Mirion Technologies is one of the world leaders in radiation detection, measuring and monitoring. Mirion has 14 facilities in Europe, Asia, and North America. Mirion Technologies is headquartered in the San Francisco Bay area and is a portfolio company of American Capital (NASDAQ:ACAS).
