Mirion Technologies to Host 2010 Radiation Monitoring Systems (RMS) User's Group

SAN FRANCISCO--(BUSINESS WIRE)-- [Mirion Technologies' Radiation Monitoring Systems \(RMS\) Division](#) has announced that it will host its 2010 RMS User's Group from April 27-28, 2010 in Provence, France. This two day event will bring together users of Mirion's RAMSYSTM radiation monitoring systems for product training, demonstrations and showcases.

"The RMS User's Group provides a unique opportunity for RMS professionals from all over the world to have in-depth discussions about products, services, and applications, as well as getting more familiar with the strength, experience and capability of our company," said Jean-Louis Gouronc, President of Mirion's RMS Division. "In addition, our product line experts will be available to share information on Mirion's broader solutions for nuclear instrumentation."

This year's meeting will be held at the Moulin de Vernegues Hotel in Pont Royal, and registration is now open. To register or obtain additional information, please contact Mrs. Céline Regne at cregne@mirion.com
